The High Flow Story – Where to now?

Malcolm Holm – Deputy Chairman, Murray Dairy

There appears to be savings with higher flows

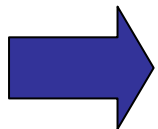

High Flow Scoping Workshop was conducted with key stakeholders:

- Farmers
- Dairy Australia
- NVIRP
- Goulburn Murray Water
- GBCMA
- NVIRP
- Murray Irrigation Limited
- University of Southern Queensland
- Irrigation Surveyor and Designers Group
- DPIV
- Rubicon
- Padman Stops

What do we want to achieve?

- Field studies supported by detailed monitoring and analysis of water use and pasture productivity.
- Cost benefit analysis of improved dry matter production and or improved water use efficiency

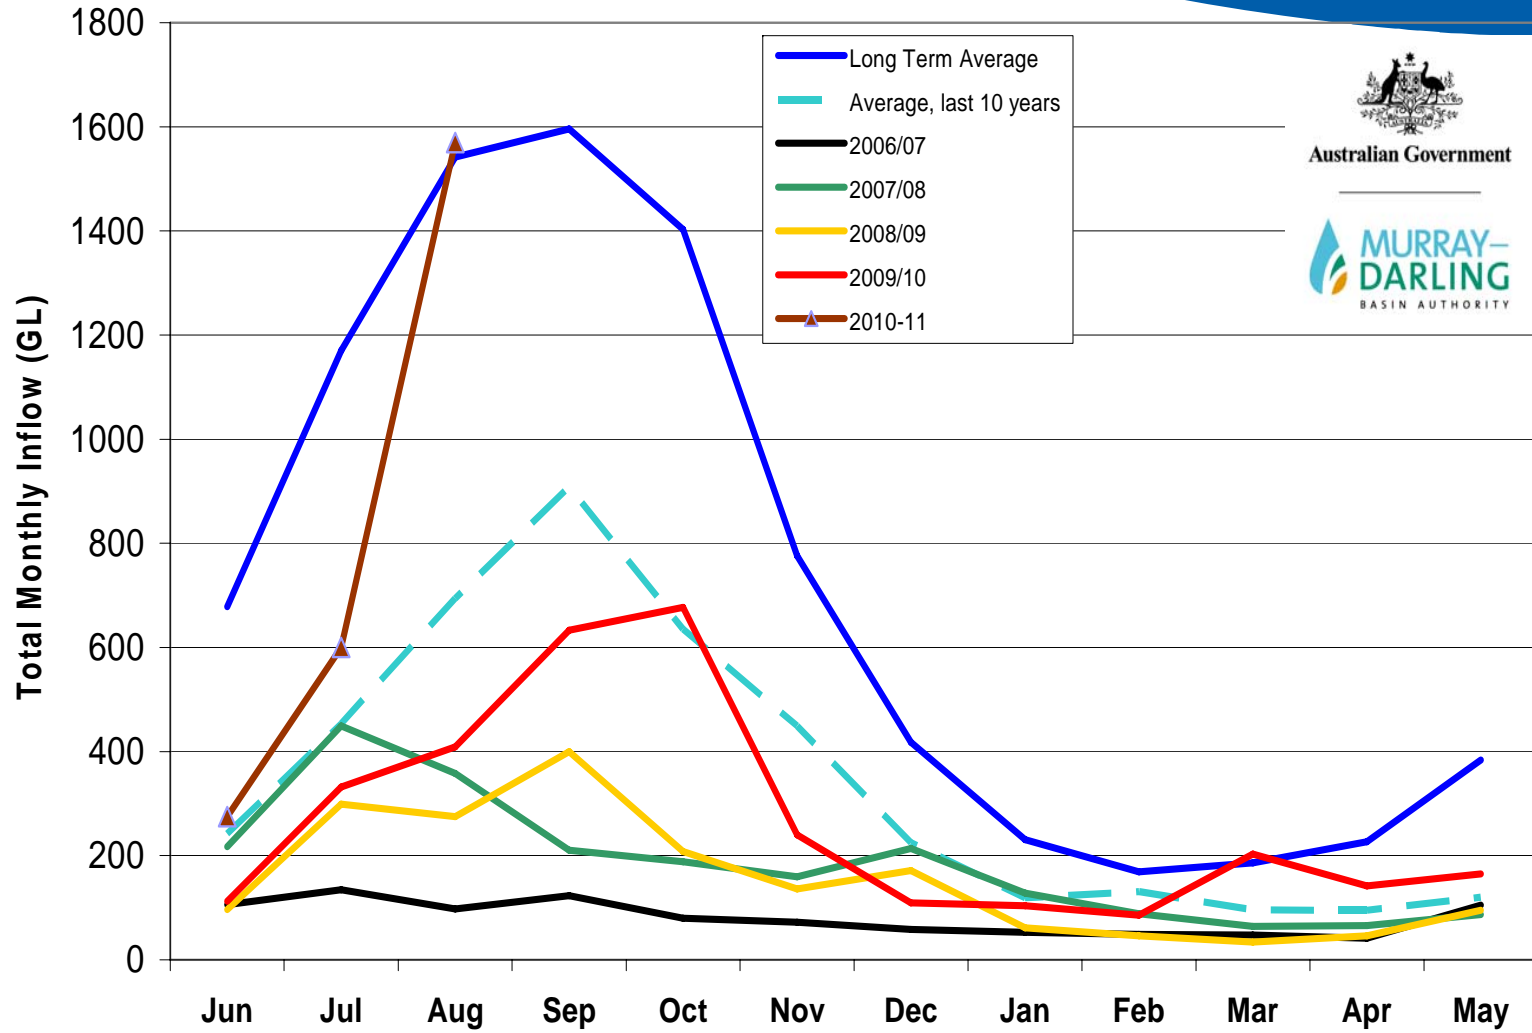

Greater confidence to make sound investment decisions on upgrading their irrigation systems and related agronomy issues

Where are we today?

- 2 sites chosen (Heavy & Light Soils)
- DPIV characterisation of sites
- Progressing 3rd site search (Medium Soils)
- Current best practice
- High Flow
